

Telecommunications Fuses

TLS Series

Compact Current Limiting Telecommunications Fuse

Description

The TLS series fuses are specifically designed for the protection of telecommunications equipment. TLS fuses have been engineered to operate up to 170 V dc to provide current-limiting, short-circuit protection of cables and components found in the dc power distribution circuits of telecommunications systems. The compact design and multiple mounting configurations of the TLS series allow it to be used in a variety of applications. Mounting configurations include cartridge, vertical, leaded, bolt-in, or solder type. These fuses are also RoHS compliant.

Features & Benefits

FEATURES	BENEFITS
Compact design	Useful in a variety of applications
Current-limiting	Provides quick response to short-circuit events
Multiple mounting options	Suitable for a variety of applications
RoHS compliant	Reduces hazardous substances

Applications

- Telecommunications DC power distribution systems

Specifications

Voltage Rating	170 V dc
Ampere Range	1–125 A
Interrupting Rating	100 kA
Applicable Standards	UL 248-1 IEC-60269-4
Material	Body: glass melamine Caps: nickel-plated brass Leads: tin-plated copper
Environmental	RoHS Compliant, lead (Pb) free
Country of Origin	Mexico

Telecommunications Fuses

TLS Series

Certification & Compliance

cURus	File: E71611
CE	EU_DOC-TLS_210921_0
TUV	Cert No: R 50494871 (70 kA IR)

Accessories

LFTD series disconnect switches
LFT30060 fuse holder for TLS series cartridge style fuse

Contact factory for more information.
