

Panduit EL2P™ Intelligent Rack PDU

Next-Generation Intelligent Power Distribution for Secure, Scalable Data Centers

Featured Products:

- E48D31L
- E42D04L
- E48G32L
- E42D06L

- ▶ Improve uptime and operational visibility with real-time outlet-level monitoring and control
- ▶ Reduce cybersecurity risk with built-in, hardware-based security and secure firmware architecture
- ▶ Accelerate deployments with a modular, standardized global platform
- ▶ Simplify operations with remote management, outlet control, and environmental monitoring
- ▶ Optimize power usage and capacity planning across high-density environments

Compliance Standards:

Safety & EMC compliance per UL 62368, IPv6 certification via USGv6, and cybersecurity certified to UL 2900-1 and IEC 62443

FEATURES & BENEFITS:

- Secure-by-design architecture (role-based access control, secure firmware, encrypted communications)
- High-density outlet configurations supporting modern IT and AI workloads
- Outlet-level metering and switching for precise power monitoring and control
- Network connectivity with support for remote access, integration, and monitoring platforms
- Firmware automation with built-in scheduling, secure supply chain through code signing, and sustainable lifecycle support with secure erase
